### The Connecticut Yankee Atomic Power Company (70-9101)

The Connecticut Yankee Atomic Power Company ("CY"), 107 Selden Street, Berlin, Connecticut 06337, a utility subsidiary of The New England Electric System and Northeast Utilities, each a registered holding company, has filed an application-declaration under sections 12(f) and 13(b) of the Act and rules 54, 87, 90 and 91 under the Act.

On December 4, 1996, the board of directors of CY voted unanimously to cease permanently the production of power at its nuclear plant. In connection with the cessation of production, CY seeks authority through December 31, 2002 for an exception from the cost provisions of section 13(b) to sell certain of its remaining non-seller produced goods to its associate companies at fair market value. These goods generally include equipment, including the

simulator, materials and supplies inventory, office supplies, and furniture. In addition, CY seeks authority through December 31, 2002 for an exception from the cost provisions of section 13(b) to sell to its associate companies at fair market value credits it has received for the enrichment process performed on previously purchased nuclear fuel. Associate companies to whom the goods and/or credits may be sold could include, but would not be limited to, Northeast Nuclear Energy Company.

Based on its review of sales of similar items, including sales by other utilities implementing decommissioning plans for nuclear plants, CY expects that these goods and credits have a fair market value that is substantially below their book cost to CY. CY believes that a requirement prohibiting the sale of these assets to associate companies at competitive prices will substantially limit the pool of potential bidders and hinder its ability to wind down its business activities economically.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.
